15th International SIIV SUMMER SCHOOL **I-BIM**
Infrastructure-Building Information Modeling

2nd SIIV ARENA

in memory of prof. Tommaso Esposito

Napoli, September 5-8, 2017

Nuovo Polo Est Federico II: Complesso Universitario di San Giovanni
Corso Nicolangelo Protopisani, 70

SIIV (Società Italiana Infrastrutture Viarie) and the Federico II University of Napoli are proud to announce they are jointly organizing the SIIV Summer School, to be held in September 5-8, 2017. SIIV is a scientific association including most of Italian academics, researchers and scholars involved in the area of Roads, Railways and Airports Engineering. SIIV Summer School is organized every year in September (first edition in 2003) and gathers PhD students, Postdoc fellows and young researchers (from Italy and abroad), providing them a platform for discussion, interactions and exchange of information. **UniNa PhD Program Board in Civil Systems Engineering grants 3 CFU credits for attendance the 2017 SIIV Summer School.** The 2017 Summer School Topic is Infrastructure Building Information Modeling (I-BIM). The subject of building information modelling (BIM) has become a central topic to the improvement of the AECOO (Architecture, Engineering, Construction, Owner and Operator) industry around the world. Transitioning BIM into the domain of infrastructure projects has provided challenges and emphasized the constructor perspective of BIM. Graduate students, scholars and faculty from Italian and foreign universities involved in the field of Transportation Infrastructure Engineering are welcome to attend. The course will be taught in English or Italian. A certificate of attendance and final test evaluation will be issued at the end of the course. **AIIT grants 3 CFP credits for attendance Session 1&2.**
