

SAFERUP!

Thinking Beyond the Pavement

SaferUP! Prize 2021

Requirements and Conditions

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 765057

Requirements

For the SaferUp! Prize 2021 we would like you to explain your on-going project to a non-scientific audience. Imagine that you want to describe it to a friend or a relative. This presentation should show that you are able to communicate in a simple way about complex research activities.

To achieve your goal, you can use different techniques and methods: make a video, create a fun presentation, use PowerPoint in non-traditional ways (e.g. making a stop-motion-like presentation), draw an entertaining comic, build a model or whatever you decide to do. In short: be creative!

The following questions should be considered while preparing your presentation:

- What is your project about?
- What is your goal and why is this project important for our future?
- Can you present any tangible results so far?

Your presentation will be judged on the following criteria:

- Concreteness in describing the research, on-going activities and results
- Effectiveness in communicating the project to a different audience
- Creativity in the production of the presentation

Your presentation, if based on time, should not be longer than 2 minutes. If you choose to draw a comic, it should not be longer than a couple of pages.

If you need some ideas, here are some examples:

What is Ocean Acidification by Alliance for Climate Education

<https://www.youtube.com/watch?v=6SMWGV-DBnk>

Water Cycle by Science Centre Singapore

<https://www.youtube.com/watch?v=WWe1BQWGv18>

The Water Cycle by Stopmogo

<https://www.youtube.com/watch?v=YRWvovaHzkM>

Gravitational Waves

Deadline

The SaferUp! Prize 2021 is created having the Early Stage Researchers of SaferUp! project in mind, but it is open to any PhD researcher. **Please send your project presentation with some basic information (name, institution, scientific project title) to saferrup@durth-roos.de by Sunday, April the 18th, 2021.**

Voting

A single SaferUp! Prize 2021 will be assigned by votes. Every ESR, every Supervisor and every Advisory Board member may attribute his/her vote. One vote per person. ESR are kindly requested not to vote for their own presentation. An online voting system will be provided to the voters on the conference platform.

Each project presentation will be accessible during the SaferUp! Week 3 from Monday, April 19th from 1 p.m. to Thursday, April 22nd until midnight.

There will be a project presentation area on the SaferUp! Week 3 platform.

Please vote in the presentation area of the SaferUp! Week 3 platform by Thursday, April 22nd.

The winner of the SaferUp! Prize 2021 will be announced during the SaferUp! Week closure on Friday, April 23rd in the early afternoon.
